

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

The oceanographic committee will remain in existence with a watching and organizing brief ready to revive the project whenever a favorable opportunity arises, and the council will doubtless report upon the whole matter to the meeting of the general committee of the association at Edinburgh next September. It is hoped that the proposed expedition is postponed only for a season, and that the interval may be usefully employed in perfecting plans and making other essential preparations.

THE NOLAN PATENT OFFICE BILL

THE American Engineering Council of the Federated American Engineering Societies will seek at the opening of the special session of Congress to have the Nolan Patent Office Bill passed.

Failure of the measure in the last session is attributed to the presence of the Federal Trade Commission section which Edwin J. Prindle, of New York, chairman of the American Engineering Council's Patents Committee in a report to L. W. Wallace, executive secretary of the council, asserts should not be enacted into law in any form even as a separate bill. The committee reports:

The bill for the imperatively necessary relief of the Patent Office, after passing the House of Representatives with satisfactory provisions for the Patent Office, failed to pass the Senate at the session just closed with those same provisions, solely because of the presence in it of an unrelated section known as the Federal Trade Commission Section.

The former opposition in the Senate to the Patent Office relief and that which forced the unacceptable reductions in salaries and numbers of examiners and clerks (which the Conference Committee was persuaded to set aside) is largely and seemingly almost wholly overcome. But the opposition in the Senate to the Federal Trade Section is determined and has expressed an intention to prevent the Patent Office from getting the desired relief unless the Federal Trade Section is removed from the bill.

More than preventing the Patent Office relief, however, the Federal Trade Section is believed to be a dangerous measure in itself. It provides that the Federal Trade Commission may receive assignments of and administer inventions and pat-

ents from governmental employees and is an entering wedge for further legislation to empower the Trade Commission to receive patents from non-governmental inventors or owners.

An exclusive license would have to be granted, at least for a few years, to induce any one to undertake the almost always necessary development expense, and the Trade Commission would surely be charged with favoritism in granting such a license. In order to protect its licensees, the Trade Commission would have to sue infringers, a most unfortunate activity for the government. The industries would close their doors to the government employees fearing to disclose to them their secrets or unpatented inventions, and research by the industries would be discouraged for fear that government employees, using government facilities, might reach the result first and patent it.

THE AMERICAN PHILOSOPHICAL SOCIETY

THE American Philosophical Society will hold its general meeting in the hall of the society on Independence Square on April 21, 22 and 23. The program includes the following discussions:

The Application of the Method of the Interferometer to certain Astronomical Researches:

To astrophysical problems: HENRY NORRIS RUSSELL, Ph.D., professor of astronomy, Princeton University.

To the measurement of double stars: FRANK SCHLESINGER, Ph.D., director, Yale University Observatory.

To the determination of stellar parallaxes: JOHN A. MILLER, Ph.D., director, Sproul Observatory, Swarthmore, Pa.

Atomic structure:

DAVID WEBSTER, professor of physics, Leland Stanford University.

WILLIAM DUANE, director of radium institute, Harvard Medical School, Boston.

BERGEN DAVIS, professor of physics, Columbia University.

On Friday evening there will be a reception in the hall of the Historical Society of Pennsylvania, when Dr. James H. Breasted, professor of Egyptology and Oriental history, University of Chicago, will speak on "Following the trail of our earliest ancestors" illustrated by lantern slides.

Award will be made of the society's Henry M. Phillips Prize of two thousand dollars for

the best essay on, "The control of the foreign relations of the United States: the relative rights, duties and responsibilities of the President, the Senate and the House, and of the judiciary, in theory and practise," and presentation of John Scott Medals "For Useful Inventions," by Owen Roberts, Esq., on behalf of the Board of City Trusts of Philadelphia.

SCIENTIFIC NOTES AND NEWS

THE National Institute of Social Sciences has awarded its gold medal to Mme. Curie.

MR. HERBERT C. HOOVER has been elected a trustee of the Carnegie Institution of Washington.

PROFESSOR A. S. EDDINGTON has been elected president of the Royal Astronomical Society in succession to Professor A. Fowler.

MR. C. TATE REGAN has been appointed keeper of zoology at the British Natural History Museum, South Kensington.

DR. JOHAN HJORT, director of the Norwegian Fisheries, has received the degree of doctor of science from the University of Cambridge.

WE learn from *Nature* that the following were elected fellows of the Royal Society of Edinburgh at the ordinary meeting on March 7: Dr. Nelson Annandale, Mr. W. Arthur, Mr. B. B. Baker, Dr. Archibald Barr, Mr. J. Bartholomew, Mr. A. Bruce, Mr. Andrew Campbell, Dr. Rasik Lal Datta, Dr. John Dougall, Dr. C. V. Drysdale, Mr. G. T. Forrest, Dr. W. Gibson, Dr. J. W. H. Harrison, Mr. J. A. G. Lamb, the Rev. A. E. Laurie, Mr. Neil M'Arthur, Mr. D. B. M'Quistan, Dr. T. M. MacRobert, Dr. J. M'Whan, Mr. J. Mathieson, Sir G. H. Pollard, Professor E. B. Ross, the Right Hon. J. P. Smith, Professor N. K. Smith, and Dr. I. S. Stewart.

AT the Chicago meeting of the American Association for the Advancement of Science, the council established a committee on conservation to cooperate with similar committees of other organizations. This new committee on conservation has now been appointed, its

personnel being as follows: J. C. Merriam, *chairman*, Carnegie Institution of Washington, Washington, D. C.; Isaiah Bowman, American Geographical Society, New York City; H. S. Graves, 1731 H Street, N.W., Washington, D. C.; Barrington Moore, 925 Park Avenue, New York City; V. E. Shelford, University of Illinois, Urbana, Ill.

DR. HAVEN EMERSON, formerly commissioner of health of New York City, has been appointed medical adviser and assistant director of the Bureau of War Risk Insurance.

DR. P. G. NUTTING, organizer and for the past four years director of the scientific research of the Westinghouse Electric Company, will not be with that company after May 1. Dr. Nutting was for ten years with the Bureau of Standards, leaving in 1912 to assist Dr. Mees in the organization and development of the research work of the Eastman Kodak Company.

DR. L. A. MIKESKA has resigned from the Color Laboratory of the Bureau of Chemistry, U. S. Department of Agriculture, to join the staff of the Rockefeller Institute for Medical Research, New York City.

DR. HENRY E. CRAMPTON, of Barnard College and the American Museum of Natural History, has returned from a nine months' trip to the tropics and the islands in the Pacific.

JOHN W. GILMORE, professor of agronomy at the University of California, has been appointed exchange professor from the United States to the University of Chile for the academic year 1921-1922.

DR. LAFAYETTE B. MENDEL, professor of physiological chemistry, Yale University, spoke before 500 members of the Chicago Section of the American Chemical Society on Friday, March 18. Preceding the talk, a dinner in honor of Dr. Mendel was served at the Quadrangle Club, University of Chicago.

ON March 12, the Mayo Foundation, Rochester, Minn., was addressed by Dr. James Ewing, President George E. Vincent and Dr. Charles Choyce.
